y0 = 0.5 x 1.2 + 0.5 x 1.0 = 1.1 y1 = 0.5 x (-0.4) + 0.5 x (-0.6) = -0.5

Conv2d(4, 2, kernel_size=1): parameters = 2 x 4 weights + 2 biases = 10. Part 10 uses this with 165 bands in, 32 out.
