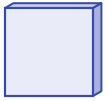
Four scales are brought to one width (256) and one size (32 x 32), stacked, merged, and unfolded to 128 x 128.



F1
(32,32,32)

1x1: 32->256 → **already 32x32**

F2
(64,16,16)

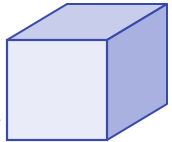
1x1: 64->256 → **bilinear 32x32**

F3
(160,8,8)

1x1: 160->256 → **bilinear 32x32**

F4
(256,4,4)

1x1: 256->256 → **bilinear 32x32**



concat
(1024, 32, 32)

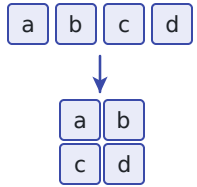
Conv 1x1 + GELU
-> 256

Conv 3x3 + GELU
-> 256

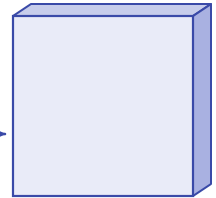
Conv 3x3
-> 512

PixelShuffle(4)
512 = 32 x 4 x 4

PixelShuffle, r = 2:



4 channels -> 2 x 2 pixels
a rearrangement, no arithmetic



(B, 32, 128, 128)
