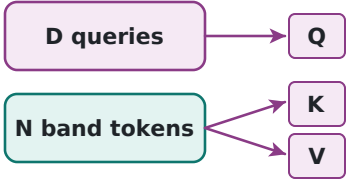
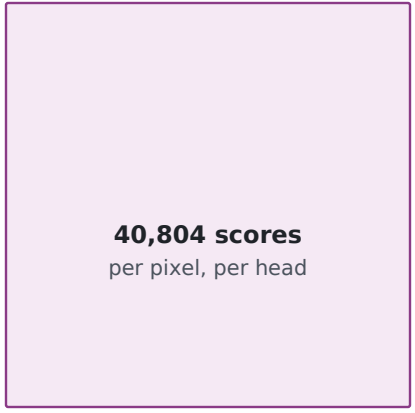
a Self: the tokens ask

b Cross: someone else asks



self: N x N = 202 x 202



cross: D x N = 32 x 202

6,464 scores

6.3 times fewer; grows with N, not N squared

Output count

self: N outputs, one per token

cross: D outputs, one per query - fixed, however many bands arrive

Rectangles drawn to scale: one unit per band or query.
