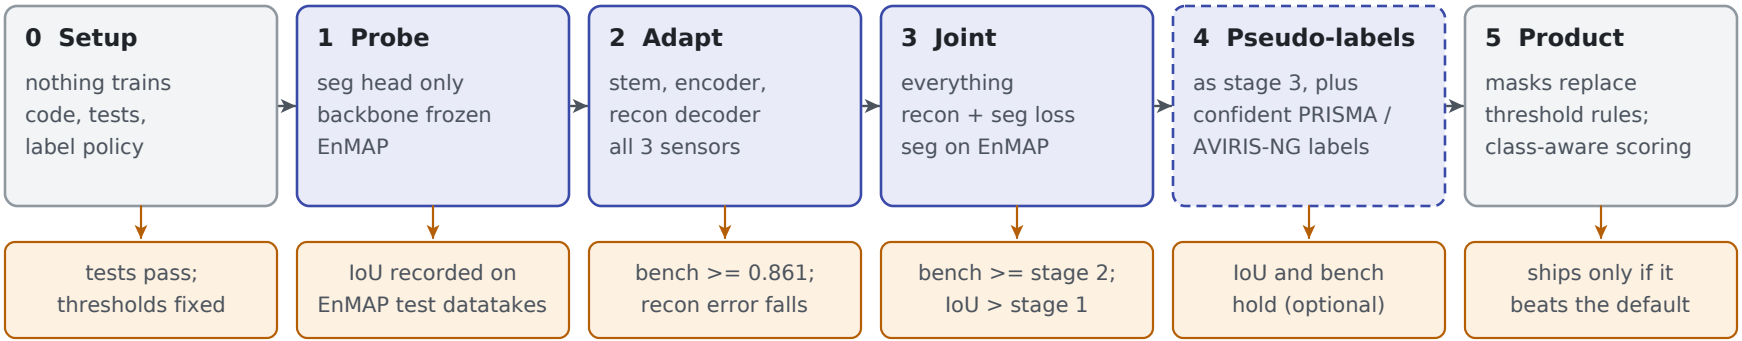
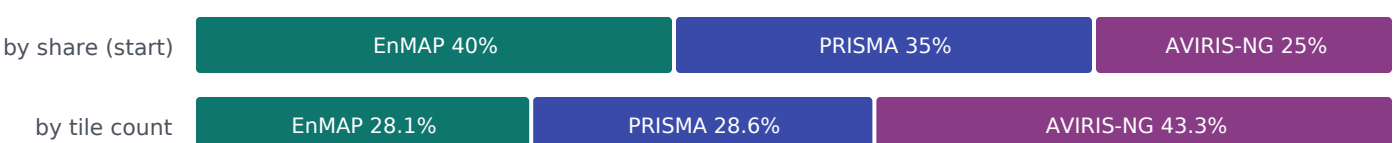
a Six stages; each must pass its gate before the next starts



bench = mean ROC-AUC on the four labelled PRISMA scenes with residual Mahalanobis; 0.861 is F001 at epoch 60.

b Batches drawn by share, not by how many tiles each sensor has



Tile counts: 14,542 + 14,802 + 22,377 = 51,721 training tiles. Shares are tuned only on the stage gates.
